

The SMS Solar Flare is a straight-ahead, 100% analog, hard-clipping distortion pedal inspired by the classics of the '70s but fused with a modern voicing approach that helps bring out a more rich and warm tone quality. The Solar Flare will cover a wide range of distortion tones from barely dirty to outright sizzling sustain for days. Three simple controls make it very easy to find the sound you're after; volume, tone, and drive.

VOLUME:

Turn knob to control output/loudness level.

TONE:

Turn knob to control amount of brightness or treble.

ON/OFF:

Push switch to engage or bypass drive effect.

DISTORTION:

Turn knob to control amount of distortion effect.

INPUT JACK:

When running off the battery (*not* a DC power supply), always UNPLUG input jack when unit is not in use for extended periods of time to help conserve battery life.

SPECIFICATIONS:

Hard Mechanical Bypass Switch - non-buffered

Input impedance \approx 700k Ohms

Battery Life \approx 100 hours

DC Power - 9v alkaline battery OR standard 9v, tip-negative guitar pedal power supply
